■ Original Articles

- Fossil benthic foraminifera from sediment core S1 of Lake Shinji, western Japan
1-7 *Hiroyuki Takata, Kazuyoshi Yamada
Kota Katsuki, Keiko Yamaguchi
Yasushi Miyamoto, Daisuke Nakayama
and Hugo Coops*

- Horizontal and vertical distribution of macroalgal assemblages
in modern Lake Nakaumi, a coastal lagoon 9-16 *Yasushi Miyamoto, Akiko Hatsuda*

- Lake floor images in the central part of Lake Nakaumi (part 1)
: wind speed impacts on bottom water motion 17-24 *Ritsuo Nomura, Koji Seto, Yuzuru Horie
and Hiroyuki Takata*

- Comparison of phytoplankton biomass above a rivermouth barrage and
in a freshwater reservoir, upper Isahaya Bay 25-31 *Yoshikuni Hodoki, Tetuo Murakami*

- Rising water level events in the Ohashi River, Shimane Prefecture
33-46 *Kengo Kurata*

- Land cover classification of the Matsue and Izumo areas with Landsat-5 TM data
47-56 *Shingo Nonohara, Toshiaki Kozu
Toyoshi Shimomai, and Yuji Sakuno*

- Estimation of Turbidity in Lakes Shinji and Nakaumi from MODIS
57-68 *Shuichiro Yamamoto, Toshiaki Kozu
Toyoshi Shimomai, Shingo Nonohara
and Yuji Sakuno*

- The oldest Shell Mound in the Seto Inland Sea
: Revaluation of Reitasaki shell mound in Teshima 69-76 *Shin Onbe, Yoshiki Miyata, Hisao Kato
Minoru Yoneda*

- Correlation of massive die-off events of *Konosirus punctatus*
with low oxygen levels in Lake Shinji 77-82 *Terumitus Miimi*

■ Miscellanea

- Progress on the prototype Lakes Shinji and Nakaumi environmental database in JFY 2006
83-90 *Yoshiaki Tsuzuki, Daisuke Nakayama
Kengo Kurata, Kenji Wakabayashi
and Hidenobu Kunii
(Secretariat of the Discussion Group on the
Lakes Shinji and Nakaumi Environmental
Database)*
